

Forever Pure

Introducing the
Kinetico K5 Drinking Water Station

See and taste the difference of clean,
crystal clear water, on tap.

Enjoy the purest water for your body, straight from the tap

Fresh drinking water is essential to our daily well being.

And in today's health conscious environment, we are more aware than ever of the impact of what we put into our body as in the way we look and feel.

We eat organic fruit and vegetables and look for only the purest ingredients in our food, so why should it be any different with our water?

With the Kinetico K5 Drinking Water Station it does not have to be.

The Kinetico K5 can remove almost everything from your drinking water that is not water.

Now you can enjoy the best tasting, cleanest water possible straight from your tap.

Using three fixed filters – a Pre-filter, Reverse Osmosis membrane filter and Post filter, the Kinetico K5 ensures the very best drinking water for your body.

How it works:

- 1 The Pre-Filter removes chlorine as well as sediment.
- 2 Using reverse osmosis technology, water is forced through a semi-permeable membrane that filters inorganic contaminants such as nitrates and metals including lead.
- 3 A post-filter removes any remaining non-organic compounds that could cause bad taste and odour

The system can also be customised for your own specific drinking water needs with the addition of further optional filters.

You can even add minerals, such as calcium and magnesium to your treated drinking water before you use it with our special Mineral Plus filter.

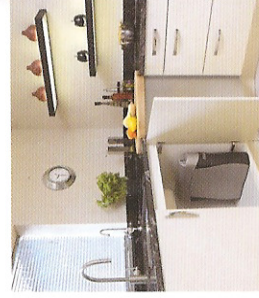

Crystal clear drinking water, all day, everyday

When you are pushed for time and simply want a glass of great tasting water or a fresh cup of tea or coffee, filling a water filter jug and waiting for the water to filter through is a real pain. Getting great drinking water should not be a luxury you have to wait for!

Carrying bottles of water home from the supermarket is hard work and a very expensive way to drink water.

The K5 Drinking Water Station is the perfect solution to provide you with great tasting, clear water, every day without the cost and inconvenience of bottled water.

Plus without the regular disposal of plastic bottles, you will be helping the environment!

The K5 Drinking Water Station is a sleek compact system that can be concealed neatly in the cupboard under the kitchen sink. It is efficient and economical to run as it does not need an electrical supply and conveniently operates on demand.

The K5 Drinking Water Station is not only certified to remove more contaminants than any other Reverse Osmosis system it also comes complete with a 10 year limited warranty.*
